

**Ispahani Islamia Eye Institute and Hospital
Bangladesh**

Training Programs of Education Department

INSTITUTE AT A GLANCE

The Hospital started its journey in 1960. The Institute established in 1992, through its different educational programs, has made a major contribution in providing ophthalmic manpower both at home & abroad. Graduates and trainees from the Institute have gone on to provide ophthalmic services across all sectors of society. Through its graduates, trainees and educational programs, the Institute is well renowned amongst professionals in a global dimension.

Till August 2018 other than hundreds of local candidates, we have trained about 60 ophthalmologists from 18 overseas countries (Azerbaijan, Australia, China, Egypt, Germany, Ghana, India, Indonesia, Jordan, Kenya, Malawi, Nepal, Nigeria, Oman, Philippine, UK, USA, Zambia).

TRAINING PROGRAM FOR INTERNATIONAL CANDIDATES

Requirements for training of all category:

Candidates who have completed post graduate degree in ophthalmology recognized by Bangladesh Medical and Dental Council (BMDC) are eligible to apply.

Accommodation for foreign trainees:

During the training period there is a provision of staying in the guest house of IIEI&H (Subject to availability) which is beside our Hospital campus.

Application process:

Interested candidates should contact the education department (education@islamia.org.bd) by mail with a copy to the Education Associate (tasriba.khan@islamia.org.bd) who will then advice about the application procedures.

INSPIRATIONS

Dr. Abdulrahman Aminatu Ali, Nigeria

"My expectation regarding surgical skills were met and even exceeded"

Dr. Eric K. Chin, USA

"I am especially grateful for the trainers who set aside their time to guide and demonstrate how to perform these surgeries. I learned so much by both watching and performing these procedures under the supervision of very skilled surgeons"

Dr. Ghada Zein El Abedin, Egypt

"Islamia eye hospital is one of the best (or the best) hospital in Bangladesh and the oldest more than 50 years...and most importantly, it is developing and (shooting) toward excellence. There is an organized system with special education department and I would like to thank all my trainers who are very keen for my training"

Dr. Tariq Ayoub, UK

"I will always remember everything I learnt at the institution and will definitely encourage other colleagues, etc. to visit/train at the institute"

Dr. Rajesh Shrestha, Nepal

"Everyone has a good attitude of helping, teaching and encouraging for the beginners. This Institute will be always remembered by me and hope it will become a good center of excellence in the field of ophthalmology of the South Asian region. I feel proud to be a student of this institute"
